Internet Policy

To reset an application password for a user, start by signing in to the portal at <https://hhsportal.hhs.state.tx.us/iam/portal/>.

On the portal Home page, click **ISIM** under My Applications.

On the ISIM page, click **Manage Users**.

Manage Users

Manage Users > Select a User

To locate a user that you want to manage, type information about the user in the field, select a filter, and then click Search. The users that match your criteria are displayed in the table below. By default, clicking Search will search the system based on the beginning letters of the item you are searching for. To search for a textual pattern in the middle of an item, use the "*" symbol on the keyboard to indicate a wildcard. (For example, typing "b*" will find "abc".)

The screen then displays a list of applications for which the user has access.

Next

If the user's Enterprise account shows as Active, but the applications the user is trying to access shows as Inactive, ask the user if they are able to log into the Enterprise Portal. If the user can successfully log into the Enterprise Portal, then have the user speak to their Supervisor about having the application that they are trying to access unlocked or reset.

[Schedule](#)

On the Change Password screen, you have two options:

- Generate a password for me
- Allow me to type a password – see the next slide for password rules

Next

Password Rules are as follows:

- The password should not be empty.
- There should be at least one upper case letter.
- There should be at least one lower case letter.
- There should be at least one number.
- There should be at least one non-alphabetic character from the following:
 - ! @ # \$ % ^ & * () _ + | ~ = ' { } [] : ? ; , . /
- Minimum length of the password should be 8 characters.
- Maximum length of the password should be 16 characters.
- At least four characters of the password must be different from the current password.
- Both new password fields should contain the same data.
- The password should not be the same as the username.

Next

If you select **Generate a Password for Me**, the user will receive a temporary password in an email. Ask the user to check their email and try the password that was sent.

If you select **Allow Me to Type a Password**, type a password and give it to the user.

Next

Once the user logs in, they will be prompted to change the password, regardless of the way the password was generated for the user.

Stay on the phone with the user until the user accesses the application in question.
