

**Quarter 1, Interim 2005-2006 Katrina Programming Changes**  
**Implementation Date: October 5, 2005**

1. **Issue:** For Katrina refugees, use Action Code 321(for adults AND children) or batch a Client Community-based Assignment code **K001**. WebCARE will allow adult consumers with LOC-R = 9 to be over-ridden into Service Package 1 or 2. WebCARE will disallow adult consumers from being over-ridden into Service Package 3 or 4. WebCARE will allow 30 days to elapse between the Section 1: TRAG Assessment Date and the LOC-A Authorization Date for both Adult and Child Assessments. WebCARE will allow Assessments to be entered for up to 45 days prior to today's date, instead of 30 days prior to today's date. The 45 day window will return to a 30 day window on November 1, 2005.

**Resolution:** For Adult Assessment screen, allow LOC-R = 9 consumers with a **K001** Assignment to be over-ridden into Service Package 2 (Service Package 1 already allows this over-ride). Do not allow consumers with LOC-R = 9 and K001 Assignment to be over-ridden into Service Packages 3 or 4. Assignment Code **K001** will be added to the Client Community-Based table to identify Katrina Evacuees. Location Codes will be added to identify the originating county/parish and state for the Katrina Evacuee.
